ArgumentParser

Class in package 'Class Diagram'

Zpracuje argumenty programu pri spuštění. Ty slouží například k rozhodnutí jestli spustit grafické nebo konzolové rozhraní.

--nogui

Platné jen pro ConsoleInterface:

--export-database (Generovaný parser bude ukládat do databáze)

--export-collection (Generovaný parser bude exportovat jako Java kolekci, platný formát jen source)

--out-format-binary (Výstupem bude binární podoba parseru)

--out-format-source (Výstupem bude zdrojový kód parseru)

ConsoleInterface

Class in package 'Class Diagram'

Konzolové rozhraní programu. Podle pokynu uživatele zadává příkazy pro **ASTBuilder**, který podle nich staví **ASTTree**.

Vstupem bude XML s vyznačenými zajímavými částmi, podle těchto částí bude generován ASTTree.
